

In the Claims

Please amend claims 1, 8, and 16, cancel claims 2, 9, and 17, and add claim 21, as follows:

1 (currently amended): A digital subscriber line self installation kit comprising:

a digital subscriber line modem;

at least one digital subscriber line filter;

a computer readable medium whose contents comprise computer readable connection software code; and

at least one an instruction manual which describes a unified installation process for the digital subscriber line modem, the at least one digital subscriber line filter, and the computer readable connection software code, wherein the unified installation process requires no at most one operating system selection step by a user and wherein all of the at least one instruction manual correspond to an operating system of the user.

↓ 2 (cancelled).

3 (original): The kit of claim 1 further comprising a container which contains the digital subscriber line modem, the at least one digital subscriber line filter and the computer readable medium.

4 (original): The kit of claim 3 wherein the container contains the instruction manual.

5 (original): The kit of claim 1 wherein the instruction manual provides a point of contact telephone number associated with the digital subscriber line modem.

6 (original): The kit of claim 1 wherein the instruction manual provides a point of contact telephone number associated with the at least one digital subscriber line filter.

7 (original): The kit of claim 1 wherein the instruction manual provides a point of contact telephone number associated with the computer readable connection software code.

8 (currently amended): A digital subscriber line self installation kit comprising:

- 
- a network card;
 - a digital subscriber line modem;
 - at least one digital subscriber line filter;
 - a computer readable medium whose contents comprise computer

readable connection software code; and

a plurality of instruction manuals including a first an instruction manual which describes a unified installation process for the network card, the digital subscriber line modem, the at least one digital subscriber line filter, and the computer readable connection software code, wherein the unified installation process requires at most one operating system selection step by a user, wherein the operating system selection step comprises selecting the first instruction manual from the plurality of instruction manuals.

✓ 9 (cancelled).

10 (original): The kit of claim 8 further comprising a container which contains the network card, the digital subscriber line modem, the at least one digital subscriber line filter and the computer readable 5 medium.

11 (original): The kit of claim 10 wherein the container contains the instruction manual.

12 (original): The kit of claim 8 wherein the instruction manual provides a point of contact telephone number associated with the network card.

13 (original): The kit of claim 8 wherein the instruction manual provides a point of contact telephone number associated with the digital subscriber line modem.

14 (original): The kit of claim 8 wherein the instruction manual provides a point of contact telephone number associated with the at least one digital subscriber line filter.

B 1
15 (original): The kit of claim 8 wherein the instruction manual provides a point of contact telephone number associated with the computer readable connection software code.

16 (currently amended): A digital subscriber line self installation kit comprising:

a network card;

a digital subscriber line modem;

at least one digital subscriber line filter;

at least one computer readable medium whose contents comprise computer readable connection software code and computer readable internet service provider specific software code; and

an instruction manual which describes a unified installation process for the network card, the digital subscriber line modem, the at least one digital subscriber line filter, the computer readable connection software code and the computer readable internet service provider specific software code, wherein the unified installation process requires at most one operating system selection step by a user, wherein the operating system selection step comprises selecting, from the instruction manual, a section of the instruction manual corresponding to an operating system of the user.

✓ 17 (cancelled).

18 (original): The kit of claim 17 further comprising a container which contains the network card, the digital subscriber line modem, the at least one digital subscriber line filter and the at least one computer readable medium.

B1
19 (original): The kit of claim 18 wherein the container contains the instruction manual.

20 (previously presented): The kit of claim 16 wherein the instruction manual provides a point of contact telephone number provider specific software code.

B2
21 (new): The kit of claim 1 including only one instruction manual.
